

# Centre for Health in All Policies Research Translation (CHiAPRT)

## 5-year strategic plan Snapshot

### Introduction

The Centre for Health in All Policies Research Translation (the Centre) based within Health Translation SA and the School of Public Health in the University of Adelaide has been established to work with policy-makers and academics at the international and national level. It aims to increase research-policy translation in ways that delivers improved public policy, and leads to better health, wellbeing, and equity outcomes.

### Purpose of the Centre

The Centre has been established to bridge the gap between the generation of research and its application to policy and practice. The Centre works across disciplinary and sectoral boundaries to foster collaborative action between researchers and

policy actors strengthening relationships, building capacity, and contributing to improved public policy and community outcomes. Ultimately, the Centre for Health in All Policies Research Translation aims to create new knowledge at the interface of research and policy. It aims to strengthen existing knowledge and then translate these lessons to the wider research and government sectors including and beyond the health sector at a national and global level.

### Partners and governance

The Centre is supported by Affiliated Partners and an Advisory Committee and operates as a multi-institutional Centre, with each Affiliated Partner collaborating on demonstration projects or research activities in line with their interest and capacity.

The Centre is jointly administered through HTSA, SAHMRI and the School of Public Health, University of Adelaide. The joint administration of the Centre eases the way for the diverse range of centre partners to collaborate on the delivery of specific projects. Partners play a range of strategic roles for the Centre and are the heart of its philosophy and approach.

These roles include:

- Strategic and political guidance
- Partnering on projects and grants
- The provision of expert and technical advice to the Centre
- Membership on the Centre's Advisory Committee.

### Advisory Committee members

- School of Public Health, University of Adelaide
